

# Pool pallet

## The benefits of the pool pallet

- light weight
- solid construction, extremely stable
- economic and efficient to use
- can carry 5 stacks of 60x40cm containers per pallet
- easy to use thanks to rounded wooden handgrips
- suitable for all internal transport systems

## About Euro Pool System

Euro Pool System is Europe's largest logistics service provider of returnable packaging for fresh products. Since 1972, Euro Pool System has developed into an all-round logistics partner for retailers. The basis of this success is the full packaging concept comprising foldable containers, rigid containers, pool pallets and BigBox. Customers can depend on the permanent availability of clean containers throughout the entire growing season. In Europe, millions of blue and green containers rotate each year and are washed after each use by one of the numerous European service centres.

### Pool pallet makes the concept complete

The pool pallet has standardised dimensions making it the perfect carrier for all types of trays. This way the pallet completes the packing concept. Like the containers, the pool pallets can be rented from any of Euro Pool System's service centres and are available to order from any of our offices. In Europe, more than 700,000 units of this pallet are in circulation. Euro Pool System regularly conducts quality checks on the pallets to ensure compliance with its strict demands, so that our customers can always enjoy top-of-the-range, quality products.

### Models

The pool pallet is available in one model only. For more product and technical specifications, please visit [www.europoolsystem.com](http://www.europoolsystem.com).

### Poolpallet

|                       |  |
|-----------------------|--|
